

# Protection for families, fortunes, and futures.

Strategic Advisory Group was founded by former intelligence officers and Tier 1 special operators who spent their careers in some of the most demanding roles the nation has. Today we serve families, family offices, executives and counsel who need a partner they can trust completely. We work quietly, completely, and on your terms.

## WHAT WE DO

---

01

### Executive Protection

Close protection for principals, families and executives, at home and across borders. From a single trip to a dedicated team that runs the security around you.

03

### Threat Assessment & Protective Intelligence

We map your exposure the way an adversary would, digital, physical and personal, then close it and watch for what changes.

Also available: security for major events, and training in medical response, driving, surveillance detection and personal safety for families and staff.

02

### Private Investigations

Investigations for families, companies and counsel: due diligence, asset tracing, litigation support and digital forensics. Gathered lawfully, handled discreetly.

04

### Facility Hardening & Counter-Drone

Residences, offices and estates surveyed on site and hardened on the ground and in the air.

## WHO WE SERVE

---

Families & private  
individuals

Family offices

Corporate  
executives & boards

Counsel & litigation  
teams

Entertainment &  
touring talent

---

*Every engagement is led personally by a firm principal. Every conversation is confidential.*

## HOW WE WORK

# Calculated, never reactionary.

Every engagement runs on the same intelligence cycle used to support national decisions, applied to your family or enterprise.

|                                                                                     |                                                                                                |                                                                                   |                                                                                                       |                                                                                      |
